Model driven architecture Wikipedia
April 18th, 2019 - Model driven architecture MDA is a software design approach for the development of software systems. It provides a set of guidelines for the structuring of specifications which are expressed as models. Model driven architecture is a kind of domain engineering and supports model driven engineering of software systems. It was launched by the Object Management Group OMG in 2001.

Transistor 101science.com
April 18th, 2019 - INTRODUCTION A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is a weak input signal can be amplified, made stronger by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be usable.
